IDENTIFIERS	*Ontario

ABSTRACT

This report presents statistical data on admission and in-course merit scholarships awarded to full-time undergraduate students at Ontario universities. Highlights include: (1) 16 percent of the first-year entering class received admission scholarships and 9 percent of the upper-year class received in-course scholarships; (2) females received more scholarships than males; (3) 91 percent of the total admission scholarships were awarded to Ontario residents; and (4) the average value for admission scholarships was $1,189; for in-course scholarships it was $930. An introductory section includes revised definitions, information on the 1996-97 survey on which the report is based, and an analysis of historical data. Section 1 provides summary statistics for 1996-97, including charts and tables comparing number and gender and enrollment for both admission and in-course scholarships. Section 2 presents 14 tables and two charts detailing such information as scholarships by gender, type and award range; number and value of scholarships by institution; total "Ontario" admission and in-course scholarships; renewable and nonrenewable "Ontario" admission scholarship; and total in-course scholarships. Section 3 provides historical data (1994-95 to 1996-97) for number of and value of admission scholarships and in-course scholarships. Appendices include definitions, guidelines, questions and answers, and directions for completing the survey form. (DB)

Background

Surveys of merit-based scholarships awarded by Ontario universities (including affiliates) to full-time undergraduate students have been conducted by the Council of Ontario Universities (COU) since 1973-74. Although the guidelines and definitions for these surveys have been amended throughout the years, this ***1996-97 report marks the beginning of a new series of reports.***

COU and the OURA Standing Committee on Scholarships and Awards, have revised the definitions and guidelines to make them more precise so that institutions will, commencing with the 1996-97 Survey, report data more consistently through the system than before. ***Therefore, comparisons with previous years' reports should not be attempted.***

The COU Task Force on Admissions Issues, whose terms of reference included (1) a review of the set of guidelines used by institutions for undergraduate admission scholarships and (2) the appropriateness of controlling numbers of entrance awards, recommended that the COU Undergraduate Scholarship Guidelines, which have been in effect since 1978, should be abolished. ***Therefore, commencing in 1997-98, universities are no longer required to limit the number of Ontario entrance scholarships to 10% of the entering class.***

Since universities have greater flexibility in setting tuition fees, which allows for increased differentiation among programs, using awards ranges tied to the GAFF (General Arts Formula Fee) no longer seemed appropriate.
Commencing with this 1996-97 report, the ranges are ≤$500, $501 to $1,500, $1,501 to $2,500, $2,501 to $3,500, and >$3,500.

Commencing with the 1996-97 report, we have asked institutions to report their major/national scholarships as a separate line item.

Definitions

(for a more detailed description of the definitions, please see Appendix A: Definitions)

The survey includes all undergraduate scholarships (merit-based only) awarded to full-time domestic students, who were enrolled in a program eligible for funding by the Ministry of Education and Training (MET) between May 1996 and April 1997.

The information presented in the accompanying tables relates to ***admission*** and ***in-course scholarships***.

Admission scholarships are awards made to students whose first registration is in the first year of university studies.

These scholarships are further broken out by ***Ontario*** (awarded to students who were registered in an Ontario secondary school or resided in Ontario, in the previous year) and ***Other*** (all other students).

In-course scholarships are awards made to students enrolled in upper years.

Admission and In-Course scholarships are further sub-divided into ***renewable/non-renewable scholarships***.

Renewable scholarships are multi-year awards and are counted as an admission scholarship in the first year, and as an in-course scholarship in subsequent years. ***Non-renewable scholarships***, on the other hand, are awarded for only one year.

It should be noted that, as it is possible for a student to hold more than one scholarship, these tables do not show the number of individuals receiving scholarships.

Scholarships awarded from the operating, endowment and donor funds only are included in this survey. Also, only internal awards are included.

Survey Report

This report is divided into three (3) sections - *Section 1: Summary Statistics, Section 2: 1996-97 Data*, and *Section 3: Historical Data*

Section 1 shows comparisons of numbers of admission and in-course scholarships to total enrolment.

Section 2 shows summary statistics, as well as current year data on Ontario Admission, Other Admission, and In-Course scholarships by institution and award range ($). All tables are further broken out by renewable/non-renewable scholarships, and gender. Also included is a table showing the number and value of major/national scholarships by institution.

Section 3 shows historical data for the past 3 years on admission and in-course scholarships by institution.

Comparative Analysis of Provincial Statistics and 1996-97 Report

16% of the first year entering class received an admission scholarship. Females fared better than males, with 18% of the female first year entering class receiving an admission scholarship, compared to 14% of males.

9% of the upper year class received an in-course scholarship. No differences were noted between males (9%) and females (9%).

Analysis of 1996-97 Findings

1. Admission/In-Course Scholarships

The total number of scholarships awarded are divided equally between admission and in-course (approximately 11,000 in each category). However, there is a slightly higher number of in-course scholarships awarded compared to admission scholarships.

Females receive a greater number of scholarships than males. Females received 58% of the total scholarships, as compared to 42% for males.

Females are more likely to receive an admission scholarship than an in-course scholarship. 62% of admission scholarships, and 55% of in-course scholarships were awarded to females.

91% of the total admission scholarships were awarded to those who attended a secondary school or resided in Ontario in the previous year, the remaining 9% were awarded to those outside of Ontario.

Renewable/Non Renewable Scholarships

80% of the total number of scholarships (admission and in-course) are non-renewable (ie offered only for one year).

Females are more likely to receive a non-renewable scholarship than a renewable one. 63% of the total non-renewable admission scholarships were awarded to females. 55% of the total non-renewable in-course scholarships were awarded to females

2. Financial

The average value for admission scholarships was $1,189; for in-course scholarships this figure was lower at $930.

Although females received more scholarships than males, the value of the award, on average was less than for males. Females received $1,155 per admission scholarship, compared to $1,243 for males.

The average value of in-course scholarships awarded were similar for both males and females. Females received $917 per in-course scholarship; males received $946.

Renewable/Non-Renewable Scholarships

78% of all admission scholarships were ≤$1,500.
81% of non-renewable admission scholarships were ≤$1,500.

86% of all in-course scholarships were ≤$1,500.
91% of non-renewable in-course scholarships were ≤$1,500.

3. National/Major Scholarships

All national/major scholarships are renewable. Approximately 120 were awarded as admission scholarships in 1996-97; 230 were awarded as in-course scholarships. Slightly more females received these prestigious awards in both admission (55%) and in-course (55%) scholarships.

Analysis of Historical Data

As a result of a revision to the definitions and guidelines for the 1996-97 survey, caution should be made in comparing 1996-97 data to previous years. The results show that more scholarships (admission and in-course) are being reported. In fact, 2,000 admission and 1,500 in-course scholarships have been added to the number of scholarships reported from previous years.

The ratio of renewable (approximately 20%) to non-renewable (approximately 80%) scholarships is the same not only for admission/in-course scholarships, but in comparison to 1994-95 and 1995-96 data.

York	372,491	321,404	405,040	571,042	509,124	617,404
Total	$4,026,353	$4,218,587	$4,906,871	$4,604,663	$5,040,710	$5,699,541

The definitions have been changed starting in 1996-97. Therefore the 1996-97 figures are not comparable to earlier years.

APPENDICES

APPENDIX A: Definitions

APPENDIX B: Guidelines

APPENDIX C: Q's and A's

APPENDIX D: Completion of the Form

APPENDIX A: DEFINITIONS

A. POPULATION

Full-time Students
A student whose study load in the fiscal year is equal to the normal full-time study load for his or her program and level of registration in the academic year.
Source: MET Ontario Operating Funds Distribution Manual.

> ***Normal Full-time Study Load***
> The normal full-time study load of an academic year in a program which would enable qualified persons whose principal activity is study at a university, to qualify for the university's degree or diploma in a specified normal number of academic years or terms for that program.
>
> ***Academic Year***
> Period of studies normally comprising the months of September to April/May inclusive.

Eligible Students
Include only those students registered in a program that leads to a qualification (degree, diploma or certificate) and is publicly funded.

Undergraduate Students
Students enrolled in undergraduate programs of study, including professional programs.
Source: MET Ontario Operating Funds Distribution Manual.

Immigration Status
Refer to the MET definition *(Element 120. Immigration or Legal Status in Canada)* to determine if a student is classified as Canadian or International.

- *Canadian students* are defined by codes 0 (Canadian citizens) and 1 (permanent residents/landed immigrants).
- *International students* are defined by codes 2 (student visa), 3 (other visa, including student who are in Canada on diplomatic, trade or other missions), and 4 (foreign student immigration status undetermined (including refugees).

B. SCHOLARSHIPS

Scholarships
Awards made primarily in recognition of the academic performance of the recipient. Other awards, including bursaries and awards based primarily on factors other than academic performance, should not be reported.

Admission Scholarships
Awards for which the selection of recipients is made at or before the time of the recipients' first registration in the first year of university studies.

Ontario Admission Scholarships
Awards made to recipients who satisfied the following criteria:

- Recipients were registered in an Ontario secondary school in the year prior to first registration in the first year of university studies, OR
- Recipients resided in Ontario in the year prior to first registration in the first year of university studies.

Other Admission Scholarships
Awards to all other recipients not classified as Ontario Admission Scholarships.

Renewable Scholarships
A renewable scholarship is to be reported according to its annual value, and is to be reported as a separate scholarship for each year in which it is held.

For example: a scholarship awarded for 4 years will be reported as an admission scholarship in the first year, and an in-course scholarship for the next 3 years.

Note: Renewals of in-course awards are to be reported as renewable even during the final year of the award.

Non-Renewable Scholarships
Non-renewable scholarships are offered for one year only.

National/Major Scholarships
The definition will be forthcoming. Please see the cover letter.

- represents a small number of the institution's most highly-valued awards program, accounting for no more than 15% of the total value of its admissions awards.
- they are advertised to eligible students across Canada, who in the early stages of the selection process need not be applicants.
- the selection process assesses in a significant way factors beyond numerical marks,

as evidenced by procedures such as a separate form, a multi-stage selection process, interviewing, etc..

Program Scholarships

These are scholarships that are tied to specific programs and/or faculties (ie. department-specific). Examples include: scholarships to students enrolled in BBA program at York, top 20 women enrolled in the Faculty of Engineering at Windsor, etc...

APPENDIX B: GUIDELINES

Students

Include only eligible undergraduate students studying full-time, i.e. those who are registered in a program that leads to a qualification (including professional programs), is publicly funded, and are Canadian citizens or permanent residents/landed immigrants.

Guideline #4

Guideline #4 is still applicable. For the purposes of this report the current interpretation of the Guideline is being adopted:

> Universities will limit Ontario entrance scholarships to a maximum of 10% of the first year full-time student class *(current year)*. Scholarships or awards of a value of less *than 50% of the GAFF for your particular institution in the current year* are not included in this limit.

In this year's report, those scholarships less than $1500 will be considered less than 50% of the GAFF.

The principle stated in Guideline #4 for the purposes of counting awards still apply.

For a complete listing of the COU guidelines on undergraduate admission scholarships, please see Appendix C.

Funds

Include scholarships from operating, endowment, and donor funds. Scholarships should be internal awards that are approved by Senate. No external awards should be included. *(It is noted that not all institutions can easily do this. Please notify me if you anticipate major problems).*

Number of Awards / Number of Scholarships

It is possible for one student to hold more than one scholarship. The body of the table shows the number of awards, we have added a column to ask you to report the number of students in each category.

National Scholarships

It is recognized that not all institutions refer to these scholarships as national (eg. president's scholarships, chancellor's scholarships, rector's scholarships).

Please report these scholarships as a separate line item on the appropriate sheet.

Definition forthcoming. Please see the cover letter.

Scholarships where Application Required:
These are normally national scholarships. For scholarships where other criteria, . other than academic criteria are considered. These could include: community involvement, extracurricular activities, leadership potential.

Scholarships where Application Not Required:
These are normally all scholarships other than national scholarships. Usually admission scholarships based solely on academic criteria. Sometimes program-based.

Internal vs External Awards
Internal awards are to be included.
External awards (eg. Canada scholarships, AUCC awards) should be excluded.

Summary

Include the following:	*Exclude the following:*
Full-time undergraduate students	Part-time undergraduate students Graduate students
Eligible students	Ineligible students
All undergraduate programs (including professional programs)	
	International students
National/Major Scholarships (as a separate line item)	
Internal awards	External awards (Canada scholarships, AUCC awards)
Non-monetary scholarships	
Scholarships to children of faculty/staff where the dollar value is not reported on the faculty/ staff T-4 slip.	Scholarships to children of faculty/staff where the dollar value is reported on the faculty/staff T-4 slip.
Program scholarships	
If the institution controls the awarding of the scholarship (ie. awards that flow through the university)	
	Undergraduate awards based on need (eg. OSOTF, bursaries, OSAP, tuition reinvestment, work study)
	Graduate awards
Awards based on merit and need - if primary criteria is merit	Awards based on need and merit - if primary criteria is need
Awards from operating, endowment and donor funds at the disposal of the university.

APPENDIX C: Q'S AND A'S

Should students who are registered in a program that is ineligible for funding be included?
No. Only students registered in a program that is eligible for funding should be included in the report.

Should students enrolled in privatized full-cost recovery programs (which are ineligible for public funding) be included from this survey?
No.

Are International students included in this survey?
No. Only Canadian or landed immigrant students should be included. Those students on Student Visa or Other Visa should be excluded.

What is the figure used for the first year undergraduate class size?
The original guidelines referred to using a 3 year moving average, which was used for Ministry funding purposes, to determine the first year undergraduate class size. The current year only will be used to determine the class size.

What scholarships are included?
Only scholarships that are approved by the university senate and is in the university calendar, should be included.
If the university controls the awarding of the scholarship, include it. If not, exclude it from the survey.
All scholarships awarded by the institution to students should be included, including any scholarships that are awarded by individual faculty/department (including professional faculties), and therefore do not necessarily pass through the financial aid office.

What is defined by a* merit *scholarship?
A scholarship based on academic qualifications as the primary determining criteria.

What is defined as a* needs-based *scholarship?
A scholarship granted when a student satisfies two requirements: need and academic critieria. Financial need is the primary determining criteria. Examples include work study, bursaries, OSOTF, OSAP, and tuition reinvestment.

If the scholarship is merit and need based, is it counted?
If the primary criterion is merit, then it is considered a merit scholarship even though there may be a need-based consideration, and it should be included in this survey.

Are* private *scholarships included?
If the scholarship is approved through the university senate, it should be included.
If a corporation gives money to the institution to give out as scholarships, then it should be included. If a corporation gives the scholarship money directly to the student or is earmarked to a specific student, it should be excluded.
As a general rule of thumb, if it passes through the financial aid office, it should be included.

Are Canada scholarships included?
These scholarships are excluded.

Are Ontario Merit Scholarships included?
No. The program is not in place.

Do we report the number of students receiving awards, or the number of awards offered? How do I count one student receiving more than one award?
If a student is awarded a $5,000 scholarship to cover, in the first instance the payment of tuition fees and the balance towards residence fees, it should be counted as 1 student and 1 award.

One scholarship at $1,000 funded by 2 sources (each contributing $500), is counted as 1 scholarship.

If a student receives 3 separate awards, it should be counted as 3 awards.

At some institutions, children of staff and/or faculty are eligible for free tuition. Should they be included?
The dividing line is if it is a taxable benefit for the faculty/staff.
If it is reported as a taxable benefit to the staff or faculty member, it should be excluded.
If it is based on merit and awarded on merit to the student, and not reported as a taxable benefit to the staff or faculty member, it should be counted.

What about non-monetary scholarships (eg. residence)?
The same principle on taxable benefit, as above, applies. If the student receives a T4A slip, it is a scholarship, and should be reported.

Do we include scholarships awarded to students in pre-university?
No. Some institutions offer a pre-university year, which is essentially an extension of high school. If the university then offers qualified applicants a scholarship is it classified as admission or in-course?
In this case, the pre-university year is classified as a transition year, and therefore the scholarship offered would be in-course.
Awards given for transition programs should be **excluded**.

Institution-specific scholarships - are they included?
Yes. Program scholarships are tied to specific programs.
Entrance scholarships given to students to attract students to the university
They both should be included.

APPENDIX D: COMPLETION OF THE FORM

One copy of each of Forms 1, 2 and 3 is required. Data on *Admissions Scholarships* should be reported on Form 1 *(Ontario Admission Scholarships)* and Form 2 *(Other Admission Scholarships)*. All other scholarships are defined as *In-Course Scholarships*, and should be reported on Form 3.

Within each category and range, renewable and non-renewable scholarships are to reported separately.

Year
Report awards which are available to the recipients during the current academic year. Awards given towards the end of the previous year are considered to be awards for the current year. Awards given at the end of the previous year are to be reported in the next year. Awards given upon graduation are not included.

University or College
Where all awards are made by the university scholarship or awards office, only one form is needed. Where awards are made by different administrative units, one forms should be submitted for each unit. Separate forms must be used for any federated or affiliated college which makes awards.

Awards Ranges
In previous years, the award ranges changed every year, since they were based on the GAFF (General Arts Formula Fee). Starting in 1996-97, tuition fees are set in a much more deregulated environment that allows for tuition fee differentiation among programs, it was decided that the award ranges based on GAFF was no longer appropriate.
Starting with the 1997-98 report, the ranges would be <=$500, $501 to $1500, $1501 to $2500, $2501 to $3500, and over $3500. It was noted that most awards are under $2200, and the upper limit is around $5000 to $6000.

Non-Renewable Awards
Enter the number of Non-Renewable Awards in each dollar range to males and females.

Renewable Awards
Enter the number of Renewable Awards in each dollar range to males and females.

Total Awards
It is not necessary to enter the Total number of awards.

Total Funds Expended
Enter the total dollar value of all awards in each dollar range to males and females. *This figure includes the dollar value of non-monetary scholarships.*

National Scholarships
Enter the number and dollar value of National Scholarships in each dollar range to males and females.

Number of Students
The body of the table asks you to report the number of awards. In this column enter the number of students receiving awards.

In the column titled *Scholarships Not Reported*, report the number and total dollar value of all available scholarships that were not awarded this year.

Note: It is not necessary to total the rows and columns.
